Enquête Djiboutienne auprès des Ménages - Indicateurs sociaux, 1996
This is a World Bank Priority Survey. The sample covers 2400 households divided into three strata: capital, other cities and rural settlements. Only one visit was paid to the each household during the collection period April 1996 to July 1996. A rather limited number of consumption items were asked for a number of different reference periods. Only 18 food items and 7 non-food items (soap, tobacco etc) were separated in the questionnaire. In addition, question on education, rents and utilities, transports and clothing were asked.
