Luxembourg Income Study (for more information about the survey please see http://www.lisproject.org/techdoc/lx/lxindex.htm)

Surveys:
Budgets familiaux 1986
The expenditure concept follows the United Nations guidelines and items are asked on a very detailed level.

European Community Household Panel Survey (ECHP) 1995-2001
This is an input-harmonized longitudinal panel survey conducted by Eurostat together with institutions in the member states. The questionnaires are standardized and weighting and imputation was done by Eurostat. The surveys have national coverage and a common set of definitions are used in all the countries. The income concept is net income with an extensive coverage of income items.
