Transmonee 2004

Surveys:
Household Budget Survey 1996, 1997
Used by Deininger & Squire (2004). The two surveys give very different results but due to lack of documentation it is hard to judge the reliability of the surveys. The survey from 1996 appears, however, to be the one of weaker quality.

Data from Transmonee
Earnings: The earnings distributions are based on net wages reported for the month of September. Ministries of Defense and Interior are excluded from the survey.

Incomes: No information about the survey is available. Monetary net incomes are reported.
