Surveys:
Survey of Income and Expenditures of Families 1953, 1963, 1969, 1977, 1979
According to Mann (1985), the income concept is gross income including monetary and non-monetary incomes. The non-monetary incomes are apparently imputed in this source. In Weisskoff (1970) the estimates are calculated from 9 original intervals in 1953 and from 13 original intervals in 1963.
