Aspirations to move beyond aid by middle-income countries

“Ghana Beyond Aid” Agenda
“It is time to build our economies that are not dependent on charity and handouts... we are not disclaiming aid, but we do want to discard a mindset of dependency... it is unhealthy for both the giver and the receiver.” (Nana Akufo-Addo, President of Ghana, 2017)

Industrial policy aspirations, requiring new sources of funding
- $2 billion from China for road projects in exchange for bauxite
- Considering century bond worth $50 billion for industrial development

Ghana is not unique
- SDG 8 and 9 place greater emphasis on jobs, industry, innovation and infrastructure
Implications of the new finance environment

**Pros**
- Markets tend to reward those with more responsible macro frameworks
  - Ghana versus Senegal
- Eurobonds offer potential for greater legislative oversight than donor finance
  - NPP in Ghana opposed the 2015 launch
- More opportunities for subnational entities (e.g. municipal bonds)

**Cons**
- Debt levels rising again just as 30 have received full amount of HIPC/MDRI relief
  - Reduction of cash transfers by 24% in Zambia
- Timing of Eurobonds has been linked to elections, reinforcing incumbent advantage

Continuing role for development assistance?

- Supporting capacity of the public sector, especially for debt management

Composition of ODA Disbursements

Continuing Role for Development Assistance?

- **Regulatory reforms** – food safety, seed safety, land governance, pesticides
  - *Example of herbicides in West Africa*

- **Policy coordination** – reconciling fragmentation created by Paris Declaration
  - *Example of New Alliance Commitments and crop cess in Tanzania*

- **Tax mobilization and tax policy consistency**
  - *Example of tax exemptions in EPZs but growth of informal sector taxes*
