

Queries and responses on the request for research proposals

Supporting development policies towards sustainable livelihoods, industrialization and resource mobilization in Tanzania

Last updated: 12 June 2019

Q.1 Is the call for research proposals limited to cover research issues pertinent only to Tanzania?

A.1 Not necessarily, we also welcome research proposals for comparative and regional studies that include Tanzania.

Q.2 My research topic requires collecting new data. Is it possible to get funds for data collection?

A.2 Typically the honorarium covers all research related expenses and payments are done against deliverables. If your research however requires collecting primary data, you can submit a separate data collection budget for our consideration. Note that data collection in Tanzania requires certain permissions from the National Bureau of Statistics.

Q.3 Is the honorarium paid only at the end?

A.3 The total fee will be paid in two instalments. First instalment is paid upon receipt of a draft working paper and second instalment is paid upon receipt of the final working paper.
