

GUIDELINES FOR PREPARING STUDIES FOR UNU-WIDER

Please adopt the following rules when preparing your paper/ study for UNU-WIDER. This will considerably reduce the time required to finalize the studies for publication.

1. Software

The manuscript can be prepared with Microsoft Word or using a LaTeX editor. Tables and figures should be editable.

Please send the paper as one document (if Word), which includes tables, figures, appendices, etc. LaTeX source files can be sent as a .zip folder.

The Word template, the LaTeX template, and LaTeX file submission guidelines can be found under the page [Info for authors](#).

2. Language/style

Papers are preferably to be submitted in British English using ‘Oxford’ spelling. However, please use ‘-ize’, ‘-zation’ in cases where an alternative ‘-ise’, ‘-sation’ exists. Exception: analyse.

Please avoid excessive use of capitalization, bold font, and italics. If you use abbreviations/acronyms, please explain when first introduced; thereafter in the text use only the abbreviations/acronyms.

Please:

- use symbols for the following currencies US\$, £, €, and the three-letter abbreviation for other currencies (see for example XE.com); no space between the currency and the amount (e.g. US\$300,000);
- bullet point lines start in lower case, unless they are full sentences; semicolon after bullet points and full stop after last point;
- use an en dash (–) for number ranges (e.g. years 1980–89);
- use ‘per cent’ not ‘%’, except in tables/figures, their titles, and notes.

3. Paper length

As a rough guide, an average paper is approximately **10,000–12,000 words** inclusive of everything (references, footnotes, figures, tables, appendices, etc.) Keep in mind that if the final destination of the paper is to be a book chapter or a journal article, then the lower end of the range is highly recommended to save authors time and work.

When an author is later requested to considerably reduce the word count of a paper (e.g. for a book chapter), a straightforward method is to cut down the number of tables and/or figures, and simply refer readers to the longer working paper, e.g. ‘See Smith (2019: Tables 4–8, Figures 3–7)’.

Large appendices can also be added as online appendices or supplementary material on the working paper web page.

4. First page

Please include:

- 120–150-word abstract, no abbreviations, **must** contain the key words;

- 5–7 key words (in order of importance, including methodology if not in JELs);
- JEL classifications, if any (in alphabetical order, maximum 4, including methodology), see: www.aeaweb.org/econlit/jelCodes.php?view=jel;
- acknowledgments (if any).

Authors' names, affiliations (including city, country), and email address of the corresponding author must be given.

Random name order (optional): Researchers are offered the possibility to use the [randomization tool](#) provided by the American Economic Association. If used, kindly inform UNU-WIDER's publication team and provide the names' order by email, along with the working paper's title.

5. Page numbering

Please deliver your manuscript with page numbers.

6. Section headings

Please use maximum three heading levels. Use sequential numbering with heading level one and heading level two; heading level three can be without numbering. **Please do not use automatic numbering.**

7. Tables/figures/graphs/maps/equations

Tables and figures should be editable. Try to avoid pasted images of tables and figures.

Table columns are generally centred (except the first column), right aligned if equal decimal points.

IMPORTANT: All tables, figures, and maps **must have their sources cited**. For tables and figures generated by the author, this information needs to be given as well—e.g. for a table 'Source: author's calculations based on [x] data'; for a figure 'Source: author's illustration based on [x] data'. If applicable, notes should be immediately under the table/figure, followed by the source. Example:

Note: figure based on data available at time of writing; database updated weekly.

Source: author's calculations based on [x] data.

If tables, figures, maps, photos, or any kind of 'artwork' have been **copied or reproduced from another publication or source**, then authors must check if **reproduction permission** is needed, and if so request reproduction permission from the original copyright holder, which can also be a publisher. For a reproduction permission template, please contact publications@wider.unu.edu. Note that often government publications, data of statistical institutes, international organizations, etc., are in the public domain ([CC 1.0](#)) and permission to reproduce is not required; this can be easily checked on the rights page of the organization's website; the correct attribution line must still be stated.

The absence of sources or reproduction permissions can add lengthy delays to publication times, particularly as publishers these days are very concerned about any possible copyright infringement.

Number your tables and figures sequentially and give each a title. Each table and figure must be introduced in the text for readers' information. Equations should be legible when printed out (not blurred).

8. Notes

Please use footnotes, not endnotes.

9. References

Special attention should be paid to the preparation of the list of references. An EndNote for UNU-WIDER style is available upon request. Please **make sure that all references cited in the text are listed in the reference list, and conversely all references listed are cited in the text.** Consistency and completeness are important.

Use the following styles for citing **within brackets** (Anderson 1991; Jones 1999, 2000; Smith 1993; Wilson and Smith 1998, 2002) **or within text** Smith (1993).

10. Citation

In-text citations are preferred; only long lists of references should be included in footnotes. Use the following styles for direct quotations **within text** including page numbers:

As previously stated by Smith (1993: 37) ‘the work of previous scholars cannot be ignored’.

Longer direct quotations should be **indented on both sides**; neither quotation marks nor italics are necessary for longer indented quotations.

Cite ‘et al.’ when 3+ authors.

11. Appendix

Appendices should be placed at the end of the paper and start on a separate page to be numbered ‘Appendix A....Z’. Tables and figures should be numbered ‘A1, A2, ...’

Some appendices can be added as online appendices on the working paper web page.

COMPILING A REFERENCE LIST

Please **add DOI links** if available. Please add date accessed when you include a URL link that is not a DOI link.

Books and chapters in books

Hertel, T.W. (ed.) (1997). *Global Trade Analysis: Modeling and Applications*. Cambridge: Cambridge University Press.

Bourguignon, F., A. Robilliard, and S. Robinson (2005). ‘Representative versus Real Households in the Macroeconomic Modeling of Inequality’. In T.J. Kehoe, T.N. Srinivasan, and J. Whalley (eds), *Frontiers in Applied General Equilibrium Modelling*. Cambridge: Cambridge University Press.

Milanovic, B. (2005). *Worlds Apart*. Princeton: Princeton University Press.

Always include ‘Place: Publisher.’

Reports (similar to books, titles in italics)

UNCTAD (2008). *Trade and Finance in a Globalizing World*. Geneva: UNCTAD.

Bank of Italy (2016). *Annual Report 2016*. Rome: Bank of Italy.
