2005-2011:

Luxembourg Income Study (for more information about the survey please see http://www.lisproject.org/techdoc/1x/lxindex.htm )

Eurostat- Statistics on income, social inclusion and living condition
OECD Database on Household Income Distribution and Poverty

Surveys:  **Budgets familiaux 1986**  The expenditure concept follows the United Nations guidelines and items are asked on a very detailed level.

**European Community Household Panel Survey (ECHP) 1995-2001**

This is an input-harmonized longitudinal panel survey conducted by Eurostat together with institutions in the member states. The questionnaires are standardized and weighting and imputation was done by Eurostat. The surveys have national coverage and a common set of definitions are used in all the countries. The income concept is net income with an extensive coverage of income items.
